# Amundi S&P 500 UCITS ETF

21 May 2025, 10:19 UTC, written by Jon Andrea Barblan

**Our Chief Investment Office (CIO) believes that stock markets can gain in the near term from falling rates and positive global growth. Within equities our CIO sees the US as one of the preferred markets.**

One of our solutions to invest passively in US Equities is the Amundi S&P 500 UCITS ETF. This solution offers the following characteristics:

- The ETF aims to track the S&P 500 Net Total Return Index.
- The Index is a widely regarded benchmark of US large caps, tracking 500 leading companies and covering approximately 80% of the US free-float market capitalisation.
- UCITS-compliant exchange-traded fund.

**Risks:** The fund invests in equities and is thus riskier than cash or bonds. The Fund's performance may not exactly track the Index. This can result from market fluctuations, changes in the composition of the Index, transaction costs, the costs of making changes to the Fund's portfolio and other Fund expenses. Additional information about these and other risks can be found in the Key Information Document (KID) as well as in the prospectus of the fund. Past performance is no indication of future results.
